

2015 PAYROLL WITHHOLDING TABLES

for MotorTraxx

Here are the 2015 payroll tax withholding tables. Make these changes *after* your last payroll of December 2014 and *before* your first payroll of January, 2015. (If you have already done payroll in January without making the changes, it is not critical. The change in withholding for some lower paid employees may be close to zero, and for higher paid employees, it will only amount to a few dollars at most.) You may manually update your tables by following these instructions:

1. Do a backup prior to making any changes to your system.
2. From the **CONTROL PANEL**, go to **3. BUSINESS OFFICE**.
3. Go to **4. ACCOUNTING OFFICE**.
4. Go to **5. PAYROLL**.
5. Go to **7. MAINTENANCE**.
6. Go to **1. TAX TABLES**.
7. Using the arrow keys, move the highlight bar down to **F1, FEDERAL SINGLE 2014**, and press **ENTER**. (Make a note of the Limits for Social Security and Medicare for step 13.)
8. To change the title, press **ENTER**, make the changes and then press **F12** to save.
9. To change the withholding amount, arrow down to the line you need to change, press **ENTER**, make the changes on that line, then arrow down to the next line and repeat.
10. To change the allowance amount, press **F2**, make the change then press **ENTER** to close the window.
11. When you have completed the **FEDERAL SINGLE** changes, press the "N" key to go to **FEDERAL MARRIED** and repeat the above procedure.
12. When the Federal changes are complete, repeat the above procedure for your State changes.
13. From the **PAYROLL** menu, choose **5. PRIOR YEAR LIMITS** and enter the values you noted in step 7.

After completing the changes, review each table to insure no fields were left blank or incorrect.
